CAREER OBJECTIVE

First-year B.Tech CSE (Data Science) student with hands-on experience building real-world web applications, AI systems, and business automation tools. Proven ability to execute client projects, deploy production-ready solutions, and learn rapidly. Interested in solving practical problems through engineering and innovation.

EDUCATION

B.Tech in Computer Science & Engineering (Data Science)

Aurora Deemed to be University (NIAT) | 2025 – Present

TGPA: 3.8 / 4.0

Class XII: 88%

TECHNICAL SKILLS

- **Programming:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks:** React.js, Tailwind CSS
- **Tools:** Git, GitHub, Figma, n8n, VS Code, Vercel, Supabase, Docker, Fast API, Railway
- **AI:** OpenAI API, Anthropic Claude, Prompt Engineering, Semantic Search, Vector Embeddings

COMMUNICATION

- **Languages:** English, Hindi, Telugu, German (Beginner)

PROJECTS

Restaurant Ordering System (Live)

- Built a direct online ordering platform for a restaurant similar to Swiggy/Zomato for a single brand.
- Reduced third-party commission dependency and increased direct customer orders.
- Improved monthly revenue by approx. ₹50,000.
- Live Website: <https://bangaruvakili.com/>
- **Tech Stack:** HTML, CSS, Tailwind CSS, JavaScript, React.js, Supabase, Vercel, Railway, Razorpay
- **Skills:** Frontend Development, Payment Integration, Database Management, Deployment, Business Problem Solving

Business AI Chatbot

- Developing an AI chatbot that instantly replies to customers and handles FAQs.
- Captures leads automatically and improves conversion opportunities.
- Automates customer communication for faster response times.
- **Tech Stack:** Python, FastAPI, OpenAI API, WhatsApp API, Webhooks, JSON, n8n
- **Skills:** AI Automation, NLP, Lead Generation Systems, API Integration, Prompt Engineering, Workflow Automation

AI Calling Agent for Hospital

- Built a 24/7 conversational voice agent for hospital inquiries and support.
- Detects customer intent and prioritizes urgent cases automatically.

- Books appointments and updates doctor dashboard in real time.
- **Tech Stack:** Python, Twilio/VAPI, OpenAI API, FastAPI, n8n
- **Skills:** Voice AI, Workflow Automation, Appointment Systems, Intent Detection, Backend Development

Semantic Search & Vector Embeddings

- Built an intelligent search system using embeddings for accurate retrieval.
- Improved search relevance beyond keyword-based matching.
- Designed scalable retrieval pipeline for AI applications.
- **Tech Stack:** Python, LangChain, FAISS/Pinecone, OpenAI Embeddings
- **Skills:** Semantic Search, Vector Databases, Information Retrieval, LLM Integration, AI Systems Development

EXPERIENCE

- Freelance Developer
- Working with **2 active clients** on real-world business solutions successfully shipped and running live: one for a **restaurant online ordering website** that increases direct sales, and another for an **AI chatbot automation system** handling customer queries, lead capture, and improved conversions.

ACHIEVEMENTS

- 4th Place in National-Level Hackathon conducted by NMIET in collaboration with T-Hub
- State-Level Hackathon Participant conducted by NIAT in collaboration with OpenAI
- Selected for Google Code Round – Round 2
- Built and deployed multiple business products in first year of engineering

LEADERSHIP & RESPONSIBILITY

- Class Representative
- Volunteered in multiple college workshops and technical events
- Co-running a freelancing agency with active client delivery
- Strong client communication and ownership mindset

STRENGTHS

Problem Solving | Fast Learner | Communication | Public Speaking | Entrepreneurship | Execution Focus | Adaptability | Client Handling

EXTRA-CURRICULAR ACTIVITIES

- State Level Cricket Player
- Part-time Content Creator
- Active in Real-World Client Projects
- Strong Interest in AI & Entrepreneurship
- Teamwork, Leadership & Communication Skills
